

FlexWave

Monday July 23, 2018, by [admin](#)

Flexwave is redefining the use of solar technology. Our invention, waveguide solar can collect wide range of incident ambient light with features of being colorful, shapeable, durable, and powerful. We provide 20% more power than traditional small solar module. Our product "Solar box" is designed for LPWAN IoT system to provide 10 years power for applications such as environmental sensor, wildfire detector, oil/gas leakage detector, and smart agriculture.
